

NURSING CARE PLAN

USING THE NURSING PROCESS & CLINICAL JUDGEMENT MODEL

- Assessment 1
- Analysis 2
- Planning 3
- Implementation 4
- Evaluation 5

Assessment - Recognize Cues

Write abnormal data in one place

1

Abnormal Tests

Abnormal Labs

Abnormal Head to Toe Assessment

Analysis - Analyze Cues & Prioritize Hypotheses

What problem(s) is the abnormal data pointing to? Prioritize it.

2

Prioritize using our Maslow for nurses pyramid

Problem 1

Problem 2

Problem 3

Evidence:

Evidence:

Evidence:

Planning - Generate Solution

What can you do to help alleviate the problem? Why?

3

Use our
SMART goal
guide

Goal:

Nursing Interventions

Implementation - Take Action

What intervention should you do first?

4

Evaluation - Evaluate Outcomes

Did the interventions helped with the problem?
If they did not, how can you improve your plan?

5

Evaluation:

Care Plan Revisions
